

## Data sheet **Monoclonal antibody to rat interferon gamma (IFN- $\gamma$ ) Biotin-labeled**

<b>Cat. No.:</b>	<b>CT033</b>
Clone:	DB-12
Isotype:	Mouse IgG <sub>1</sub>
Production:	<i>In vitro</i> using serum free medium.
Purification:	Ion exchange chromatography.
Labeling:	With Biotin-7-NHS (N-hydroxysuccinimide).
Packaging:	Lyophilized and vacuum-packed.
Contents:	50 $\mu$ g/vial
Buffer:	Prior to lyophilization: 0.5 ml PBS + 1% BSA + 125 mM trehalose.
Specificity:	Non-neutralizing antibody. The antibody does not bind to mouse IFN- $\gamma$ , rodent IFN- $\alpha$ and - $\beta$ or to human IFNs.
Sterility:	Membrane filtered (0.2 $\mu$ m).
Reconstitution:	Dissolve the contents of the vial by injection of 0.5 ml sterile distilled water.
Stability:	Lyophilized product is stable for at least one year at 4 $^{\circ}$ C (expiry date is indicated on the vial). After reconstitution, the contents can be safely stored at 4 $^{\circ}$ C for one month or for one year at -20 $^{\circ}$ C. Add 0.02% sodiumazide to prevent bacterial growth.
Quantitation:	Antibody concentration was determined by absorbance, taking A <sub>280</sub> =1.4 for a 1 mg/ml solution.
Application:	ELISA systems Immunohistochemistry
