

Data sheet **Blocking stock solution (10x)**

Cat No.: CT363

Specificity: This solution has been developed to prevent non-specific binding of detector antibodies and conjugate in the ELISPOT. The solution is suited for both the enzymatic staining procedure on PVDF membrane-bottomed plates and the silver staining procedure on polystyrene-bottomed plates.

Application: Prior to use, dilute the solution 10 times with pyrogen-free PBS. Apply 200 µl/well under aseptic conditions. Cover the plate and incubate for 2 hours at room temperature.

Contents: 10 ml.
Preservative free.

Sterility: Membrane filtered (0.2 µm).

Packaging: 10 ml clear glass bottle.

Storage: Refrigerated.
The solution can be safely stored at 4°C for a defined length of time (expiry date indicated on vial). After opening, the product expires after 6 months when kept sterile.

General: A clear light yellow solution.
Do not use if the solution is or has become turbid.

Safety: The product is not classified as hazardous according to Regulation (EC) no. 1272/2008 and its amendments.
Consult the material safety data sheet (MSDS) for further information regarding hazards and safe handling practices. The MSDS can be found on our website www.ucytech.com.
